

The background of the slide is a photograph of a wooden bookshelf filled with books. The books are of various colors and sizes, with some spines clearly visible. The text is overlaid on a semi-transparent white rectangular box in the upper half of the image.

COURSE PLAN, UNIT PLAN AND LESSON PLAN

Mrs.B.Kavitha M.Sc (N),
Professor
Aswini College of Nursing, Thrissur

COURSE PLAN

MEANING

- ❑ A course may be defined as a complete series of studies leading to graduation or a degree.
- ❑ It mean any of the separate units of instruction in a subject made of lectures & classes.
- ❑ When all the relevant subject matters are organized under one course heading it refers to planning course of instruction.

DEFINITION

1. "Course planning refers to planning courses of instructions. It serves as a guide for the teacher as well as for the students in creating conducive atmosphere for worthwhile learning and purposeful activities".
2. "It is defined as a process of planning the entire content of the program which has to be done before the commencement of course".

PURPOSE OF COURSE PLANNING

- To ensure autonomy.
- It gives stability.
- It helps to solve the problem.
- It supports the curriculum process.
- It secures future progress.
- It brings about improvements.
- It promotes the utilization of resources.

LEVELS OF COURSE PLAN

- ❑ 1. Pertaining to organizing both content and learning experiences within a unit or a subject.
- ❑ 2. Deals with designing the pattern for the entire program at the program level.

PRINCIPLES OF COURSE PLANNING

- State the objectives in behavioral terms, which has to be achieved
- Establish sequence in order of Succession, the content materials has to be organized.
- The teacher should keep in mind
 - What should the students learn from the course?
 - What should be the sequence of topic/units?
 - How much time has to be allotted.
- Ensure logical and psychological continuity to organize to continuity into fewer units, easy to understanding and repetition.

PRINCIPLES OF COURSE PLANNING

- Provide cumulative learning by reinforcement
- Plan for integration
- Select an approach that is acceptable to all teachers.
- The course should provide variety in mode of learning
- Unity curriculum :
 - To reduce unmanageable bulk of specialized subjects and bring some unity into atomized specialization.
 - It also reduces the unit to manageable size and serves as a Centre of organization.

STRUCTURE OF COURSE PLANNING

In planning course, two kinds of planning are involved:

- ❑ 1. Identifying the kinds of elements and which specific learning has to be organized
- ❑ 2. Selection of specific organizing centers on which learner's entire development be focused.

ELEMENTS OF COURSE PLANNING

- Objectives –State the objectives or outcomes to be achieved through the given course.
- Specifications for level of learner and placement within the curriculum.
- Resources material needed for the course.
- Mention the placement of the course within the curriculum. Eg:- A course in Nursing foundation is placed in the Ist yr of nursing curriculum.
- Organize the content in topic wise & unit wise.
Describe the resource materials and method of teaching

ELEMENTS OF COURSE PLANNING

- Objectives –State the objectives or outcomes to be achieved through the given course.
- Specifications for level of learner and placement within the curriculum.
- Resources material needed for the course.
- Mention the placement of the course within the curriculum. Eg:-
A course in Nursing foundation is placed in the Ist yr of nursing curriculum.
- Organize the content in topic wise & unit wise.

ELEMENTS OF COURSE PLANNING

- Describe the resource materials and method of teaching.
- Prepare the plan of learning activities for students.
- Mention place, length of experience, experience record/ cumulative record , observations, procedures, plan for Rotation with field experiences, supervised and guided practice.
- Evaluation measures.(ongoing ,concurrent and terminal evaluation)
- Bibliography(for both student and teachers)

TEACHERS ROLE IN COURSE PLANNING

- Teachers plan unit of work.
- He /She should select materials and learning activities according to the level of students.
- He/ She should plan carefully.
- He / She should avoid gaps and non- projective repetition in subject matter content.
- He/ She should provide enforcement of previous learning.
- He/ She has to set up working groups.

TEACHERS ROLE IN COURSE PLANNING

- He/ She should have skills related to their teaching area.
- The teacher's plan should focus on the course's general objectives, the unit plan, and the class plan.
- He/ She should be efficient in preparing course plans.
- He/ She should be accountable for every step of planning.
- He/ She should plan equally for all the students.
- He/ She should formulate the objectives before the planning.
- He/ She should possess knowledge adequately.

Appendix 4: Course plan

Sample Course Plan

Name of the Course	: Communication and Educational Technology
Placement	: II year BSc (N)
Hours Prescribed	: 90 hours

General Objective

This course will help the students acquire knowledge and understanding of principles and methods of communication and teaching and develop desirable attitude and skill in communicating effectively, maintaining effective interpersonal relations, teaching individuals and groups in clinical, community health and educational settings.

Specific Objectives

- Review communication process
- Establish effective interpersonal relations
- Explain the concepts of human relations
- Discuss guidance and counseling methods
- Explain the principles of teaching and learning
- Discuss the concepts of curriculum
- Describe the methods of teaching
- Explain the audio-visual aids used in teaching
- Describe the various methods of evaluation
- Explain health education.

S. No.	Time (Hours)	Specific objectives	Content	Teaching-learning activities	Evaluation
1.	5	Review communication process	Review of communication process: Definition, elements, facilitators of communication factors influencing communication barriers and techniques of overcoming.	Lecture discussion role play exercise with audio/video taps assignment	Short answer objective type evaluation of assignment.

Contd.

S. No.	Time (hours)	Specific objectives	Content	Teaching-learning activities	Evaluation
2	8	Discuss interpersonal relationship	Interpersonal relations: Definition, purpose and types, theories, barriers and techniques of overcoming. Intran window	Lecture discussion role play exercise with audio/ video tape assignment	Short answer objective type evaluation of assignment
3	8	Explain the concepts of human relations	Human relations: Understanding self-conception, social behaviour, attitude, group and group dynamics, teamwork and human relations in context of nursing	Lecture discussion role play assignment	Short answer objective type evaluation of assignment
4	8+5	Explain guidance and counselling methods	Guidance and counselling: Definition, principles, approaches, techniques, areas of counselling, group guidance, organisation of counselling services, role of counsellor, problems of the counsellor and counsellee, management of disciplinary problems and management of stress and referral	Lecture discussion role play assignments	Short answer objective type assess performance in role play. Evaluation of assignment
5	8	Explain the principles of teaching and learning	Principles of education and teaching-learning process: Education--Definition, levels, agencies of education. Relationship between philosophy and education. Nature and characteristics of learning, principles and theories of teaching, formulating objectives, general and specific classroom management role of the teacher lesson plan, unit plan and course plan	Lecture discussion prepare lesson plan. Microteaching exercise on writing objectives Role play assignment	Short answer objective type assessing lesson plans and teaching sessions evaluation of assignment
6	8+2	Discuss the concepts of curriculum	Curriculum: Definition, nature of curriculum, factors and determinants of curriculum, phases and steps in curriculum development	Lecture discussion prepare curriculum plans assignment	Short answer objective type evaluating lesson plans
7	10+10	Describe the methods of teaching	Methods of teaching: Definition. Classroom methods Clinical methods	Lecture discussion conduct teaching sessions using different methods and media	Short answer objective type assessing teaching sessions
8	8+6	Explain the audio-visual aids used in teaching	Educational media: Definition, purposes, types, principles, graphic aids, three dimensional aids, printed aids, projected aids audio aids and computer.	Lecture discussion demonstration prepare and use different teaching aids	Short answer objective type assessing the teaching aids prepared
9	8+6	Describe the various methods of evaluation	Assessment: Definition, purpose and scope, criteria for selection of assessment techniques and methods, assessment of knowledge, attitude and skill	Lecture discussion exercise on developing different types of evaluation tools assignment	Short answer objective type evaluation of tools prepared. Evaluation of assignment

Contd...

S. No.	Time (Hour)	Specific objectives	Content	Teaching-learning activities	Evaluation
10	5	Explain health education	Information, Education and communication for health (IEC): Definition, principles, health behavior and health education, health educating individuals and groups, communicating health messages, methods and media and using mass media	Lecture discussion role play plan and conduct health education sessions for individuals and groups	Short answer objective type assessment of health education session.

UNIT PLAN

INTRODUCTION

The planning for the unit is known as 'UNIT PLAN' usually after the year plan, the teacher plans the unit plan. So the year plan should therefore be ready before one starts preparing the unit plan.

DEFINITION

- Unit may be defined as a large subdivision of the subject matter.
- Planning the unit is known as unit planning.

CRITERIA FOR A GOOD UNIT

- Principle of learning by whole.
- Principle of simple to complex
- Principle of concrete to abstract
- Principle of integration
- Principle of relatedness
- Principle of specification
- Principle of sequence

-
- A good unit includes the scope for variety of learning experiences in relation to the subject matter learned.
 - A good unit places all the relevant topics together.
 - It helps us to plan for time specification to complete the unit, scheme of evaluation, etc.

CHARACTERISTIC OF UNIT PLAN

- Learning takes place of whole rather than fractions.
- Learning is developmental and therefore provides for vertical and horizontal organization of learning experiences.
- Learning is maximum when there is understanding and acceptance of goals to be achieved.
- Learning needs to differ in accordance with individual differences and learning interest.
- Unit planning recognizes that true learning renders the learners increasingly skill in self- directions.
- Unit planning provides sound basis for the evaluation.

TYPES OF UNIT PLANNING

- 1) SUBJECT MATTER UNITS
 - a) Topical unit
 - b) The generalization unit
 - c) The unit based on significant aspect of environment or culture
- 2) EXPERIENCE UNIT
 - a) Unit based on center of interest
 - b) Unit based on student purpose
 - c) Unit based on student need
- 3) TEACHING- LEARNING UNIT
- 4) PROCESS UNIT
- 5) RESOURCE UNIT

ESSENTIAL ACTIVITIES IN PLANNING A UNIT

- Selection & statement of objectives
- Selection of type of unit to be used
- Selection of the learning situation
- Selection of knowledge component (content)
- Selection of organization centers -teaching & learning activities
- Selection of methods of evaluation
- Selection of reference.
- Distribution of time
- Teacher's expertise
- Organization of the content of unit

STEPS IN WRITING A UNIT PLAN

- Read the subject matter related to the topic in detail.
- Discuss with experts on the subject & also refer to university syllabus.
- Include students & develop the unit cooperatively by the teacher & student.
- Write down the detail such as the title of the unit, number of hour required to teach & the practical experience, placement in the curriculum, etc.
- Formulate the central objective & contributory objectives.

STEPS IN WRITING A UNIT PLAN

- Identify the content area & the methods of teaching.
- Plan the teaching learning activities to attain the objectives.
- Select the instructional aids to be used.
- Plan the experience- clinical, laboratory, visits etc.
- Decide on the approximate no. of hrs to be given to classroom & clinical learning.
- Plan appropriate methods of evaluation & select the tools or construct test for evaluation.
- Provide a list of books, journals, etc for reference.

UNIT PLAN - NURSING FOUNDATION - I (Including First Aid module)

Course	: BSc Nursing
Placement	: I Semester BSc Nursing
Subject	: NURSING FOUNDATION - I (Including First Aid module)
Unit	: I
Unit Title	: Introduction to health and illness

CENTRAL OBJECTIVE:

At the end of the unit, the students will acquire in depth knowledge regarding concept of health and illness and will able to practice these knowledge in their professional life with a positive attitude.

1

SPECIFIC OBJECTIVES:

At the end of the class, the students will be able to,

- define health
- explain Maslow's hierarchy of needs
- discuss Health – Illness continuum
- describe Causes and risk factors for developing illnesses
- mention illness
- illustrate the Impact of illness on patient and family

Unit	Time (hrs)	Specific objectives	Content	Name of the faculty	AV aids	Teaching learning activity	Assessment methods
I	5(T)	Describe the concept of health and illness	Introduction to health and illness • Concept of Health – Definitions (WHO), Dimensions • Maslow's hierarchy of needs • Health – Illness continuum • Factors influencing health • Causes and risk factors for developing illnesses • Illness – Types, illness behavior • Impact of illness on patient and family		LCD OHP	Lecture cum Discussion	Essay Short answers

LESSON PLAN

DEFINITION

Lesson plan is the title given to a statement of achievements to be realized & specific meaning by which these are to be attained as a result of the activities engaged during the period. -NL Bossing

- It is the teacher's mental and emotional visualization of the class room experience as he plans it to occur.
- It is the blue print and a plan of action of what a teacher is going to do.

PURPOSES

- It guides the teacher in presentation of subject matter & activities involved.
- It provides definite objective for each day's work.
- It helps to achieve definite goals & objectives.
- It helps to maintain sequence of content presentation.
- It aids in time management& helps to avoid repetition.
- It gives the teacher greater confidence & greater freedom in teaching.
- It facilitates self & peer assessment of teaching & future improvement of lessons.

PURPOSES

- It aids in deciding in advance of the AV Aids & techniques to teaching.
- It focuses on consideration
 - Of goals and objectives,
 - Selection of subject matter,
 - Selection of procedure,
 - The planning of activities
 - The preparation of test of progress

PURPOSES

- It keeps the teacher on the tracks
- Ensures steady progress and a definite outcome of teaching and learning procedure
- It encourages organization of subject matter and activities.
- Prevents haphazard teaching.
- It serves as a check on unplanned curriculum-continuity and inter connectedness.
- It provides basis for evaluation.

PRINCIPLES

- Used as a guide rather than as a rule of thumb
- Teacher must have mastery of and adequate training in the topic
- Needs to be fully conversant with new methods and techniques of teaching
- Minimizes the chances of omitting some vital point of the information.
- Needs to organize the material in an organized rather than a logical fashion
- Must ensure active student participation
- Should use different teaching learning methods

PREREQUISITES FOR GOOD LESSON PLANNING

- The teacher should have adequate mastery and Practice if it is for a skill lesson.
- The teacher must be fully conversant with new methods and techniques of teaching her/his subject.
- Teacher must have good knowledge of psychology, culture and community and cite various examples accordingly.
- Ensure active learner participation during a class.
- Maintain interest and motivation of student.
- Avoid boredom.
- There should be variety and novelty in type of presentation.

ESSENTIAL ELEMENTS OF LESSON PLAN

- ❑ Front page data such as Name, subject, topic, class, duration, venue, A.V. Aids etc.
- ❑ Evaluation of previous knowledge.
- ❑ General learning objectives/ Central objectives.
- ❑ Specific learning objectives/ Behavioral objectives
- ❑ Selection & organization of subject matter- the content.
- ❑ Organizing centers includes learning activities & teaching activities.
- ❑ Types of illustrative material- AV Aids.
- ❑ Assignment
- ❑ Evaluation
- ❑ Follow- up action.

STEPS IN DEVELOPING A LESSON PLAN

- Preparation or introduction

- Knowledge which helps to lead them onto lesson.

- 1)Teacher prepares student to receive knowledge.

- 2)Testing previous knowledge.

- 3)It arouses interest and curiosity to learn new matter.

- 4)Introduction should be brief and to the point.

- Presentation

- 1)Aim of the lesson should be clearly stated before the presentation.

- 2)In teaching –learning process, both –actively participate.

- 3)The Teacher has to present the topic in enthusiastic manner

- 4)learner will be motivated and get interest to learn

Introduction

Presentation

Comparison

Generalizations

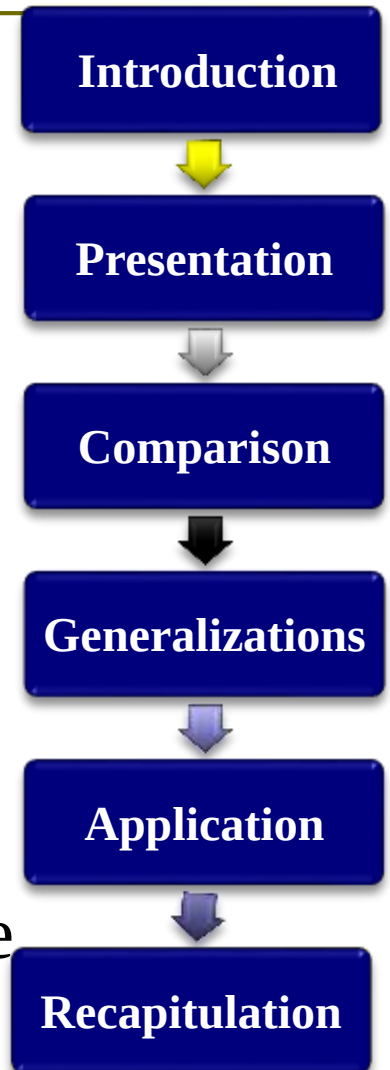

Application

Recapitulation

STEPS IN DEVELOPING A LESSON PLAN

- Comparison or association
 - 1)Quote examples
 - 2)Associate facts with to example
 - 3)So that learner can understand very easily and arrive at generalization on their own
- Generalizations
 - 1)It involves reflective thinking.
 - 2)Knowledge presented by the teacher should be thought provoking.
 - 3)Innovating and stimulating to assist the students to generalize the situation.

STEPS IN DEVELOPING A LESSON PLAN

- Application

- 1)The student make use of the knowledge acquired
- 2)Whatever they learnt in the theory has to apply in clinical field to make learning more permanent and worthwhile.

- Recapitulation

- 1)Ask suitable stimulating pivotal questions to student on topic.
- 2)The answer will give feedback, regarding the efficacy of the method of teaching clarification needed or not

FORMS OF LESSON PLAN

Herbartian approach

- John Frederick Herbart (1776-1841)- a German Philosopher and great educationist
- This approach is influenced by classical human organizational theory
- The previous knowledge of the student is considered in preparing lesson plan, but their abilities, attitudes and values are not taken into consideration while designing a lesson plan.

Blooms approach

- Designed by B .S . Bloom (1961)
- He has made education as objective centered rather than client centered
- His approach of lesson planning is termed as evaluative approach

Features

- All educational activities are objective centered
- The teaching and testing should be objective centered
- The term evaluation concerns with all activities of teaching and testing
- It does not confine to the students achievement only
- It evaluates the teaching, learning objectives, methods and devices of providing learning experiences.
- The student performances are evaluated in terms of learning objectives and not the achievement of the content

RCEM Approach

- Developed by Indian educationists at Regional college of Education , Mysore
- Design of lesson planning:-
 - **Input:** Input refers to the objectives of the plan. They are known as expected behavioral outcome. (EBO). They are classified into following categories: 1. Knowledge. 2. Understanding. 3. Application. 4. Activity.
 - **Process:** The process refers to the teaching strategies. They are: • Communication strategy. • Instructional aids. • Learning situation. • Technique of motivation
 - **Output:** Refers to the real learning outcome. This includes general and specific objectives.

Advantages / Disadvantage

Students:-

Merits

- A well presented class may increase the student's motivation
- Greater scope for improving and modifying the learning experience

Demerits:-

- ❑ Student attention may want the presentation to suit the level of understanding of all students
- ❑ Poor planning and lack of direction of teaching may result in wasting student time
- ❑ Poor lesson plan can make the student a mere passive learner

Advantages / Disadvantage

Teacher

Advantages

- The teacher can plan the presentation in advance, helping in making the teaching effective
- Helps in apparent time saving and avoids unnecessary repetition
- New knowledge can be presented which is not there in the text book
- Teacher can integrate the subject matter
- It enables the teacher to present a large amount of information in a short time
- It acts as a plan for self criticisms and self evaluation

Disadvantage:-

- The main emphasis is given to presentation
- It confines the teaching up to memory level only
