

Agenda JSON → Matches Grid + Player (PHP)

Below are drop-in files. Update the API endpoint in `config.php`.

/config.php

```
<?php
return [
    // Replace with your live endpoint
    'AGENDA_URL' => 'https://www.trtvenvivo.com/agenda.json',
    // Cache seconds (to reduce remote hits)
    'CACHE_TTL' => 60,
];
```

/includes/helpers.php

```
<?php
// Simple helpers
function h($str){ return htmlspecialchars($str, ENT_QUOTES, 'UTF-8'); }

function cache_path($key){
    $dir = __DIR__ . '/../storage/cache';
    if(!is_dir($dir)) mkdir($dir, 0775, true);
    return $dir . '/' . md5($key) . '.cache.json';
}

function get_json_cached($url, $ttl = 60){
    $cacheFile = cache_path($url);

Notes & Tips

- `decode_real_url_from_embed()` base64 ko decode karke **real streaming URL** nikalta hai.
- Default behaviour `player.php` mein **upstream embed** use hota hai (`/stream/eventos.html?r=...`). Agar tum direct real URL iframe karna chaho to `?real=1` add kar do.
- `CACHE_TTL` ko 60s rakha hai taki server par load kam ho; tum apni zarurat ke hisaab se badha sakte ho.
- Legal: third-party streams embed karte waqt apni jurisdiction ke hisaab se rights/compliance check karna zaroori hai.
